WHY MORE THAN LIGHT ME

The Commitment

One factory, one standard — from crystal cutting to container loading.

Factory Direct Price

Design, glass blowing, metal finishing and assembly under one roof — no trading margin, stable cost for project budgets.

Custom-Made Service

Size, finish, color and crystal density tailored to your PRIVATE RESIDENCE — drawings confirmed before production, samples on request.

Global Project Support

Villa and residence project cases references worldwide — installation drawings, spare parts and on-site guidance for every order.

SINCE DAY ONE

One atelier for spaces.

Living room statement pieces, dining pendants, staircase long chandeliers and fixtures — engineered as one visual language, delivered in one shipment.

SELECTION NOTE

Warm, neutral palettes suit classic **PRIVATE RESIDENCES** and reception halls, while graphic linear and ribbon designs define contemporary double-height spaces.

Round ceiling coves call for clustered or rain-style compositions, fireplace walls take vertical gold cascades, and dark modern lounges come alive under illuminated sculpture. Every piece can be resized, recolored and re-proportioned to the exact ceiling height.

DINING ROOM

Dining Room

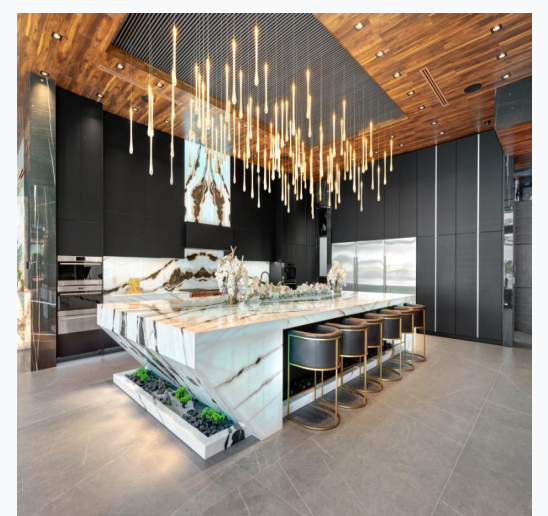

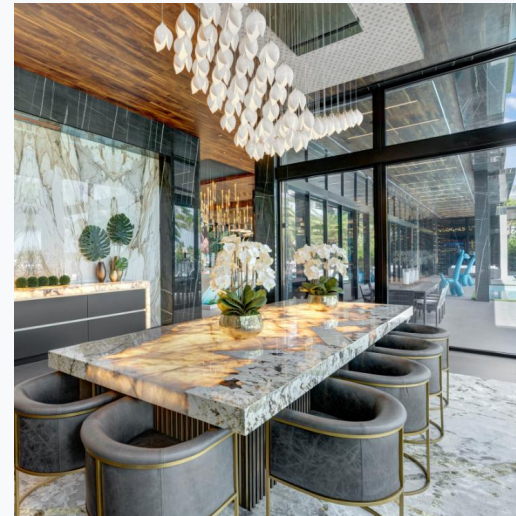

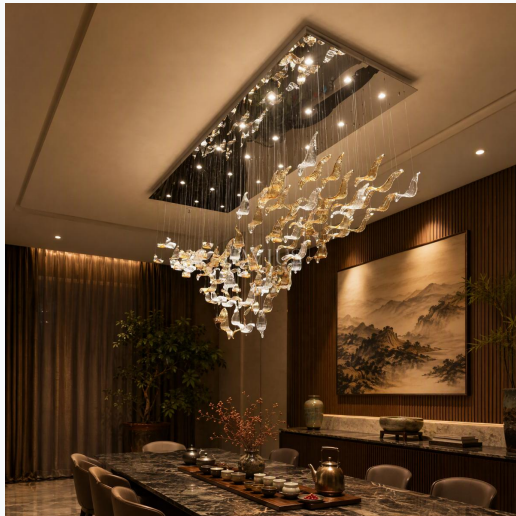

SELECTION NOTE

Dining rooms ask for light that anchors the table without stealing the view.

The dining table serves as the core piece of furniture around which every design scheme must be harmonized. Lighting choices can be tailored to the table's geometry: radial designs complement round tables, horizontally extended designs suit rectangular tables, and compact, clustered arrangements work well with kitchen islands. The length, suspension height, and finish of each fixture can be precisely customized to match the specific dimensions of the dining table.

STAIRCASE

Staircase

· PRIVATE RESIDENCE CHANDELIER COLLECTION

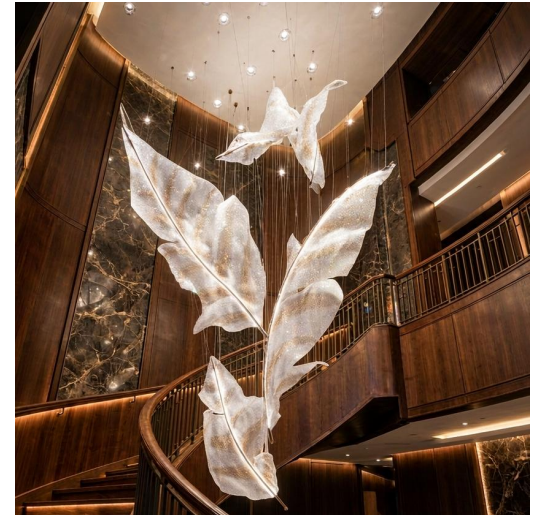

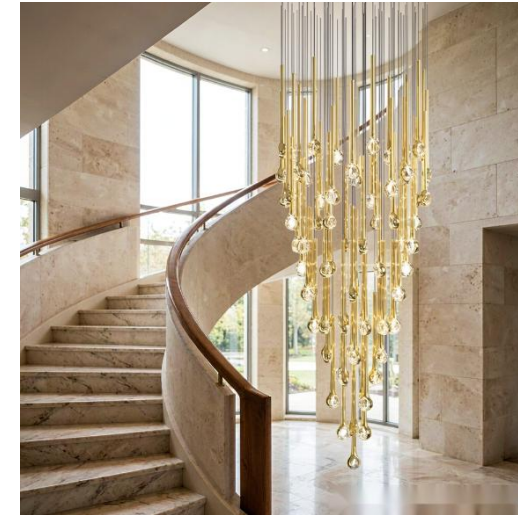

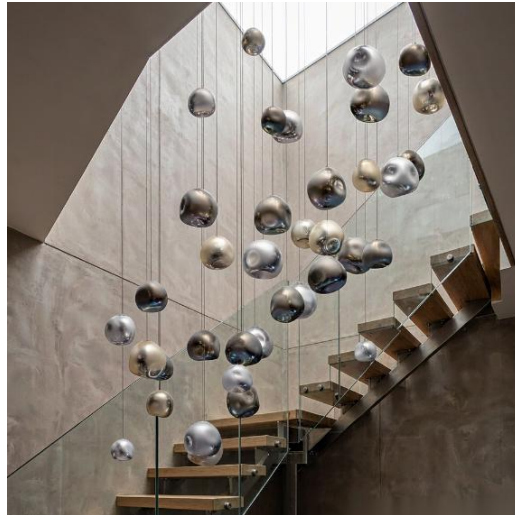

SELECTION NOTE

Match the glass to the stair's path — spirals for spiral stairs, diagonal swarms for straight flights, columns for square wells.

The selection rule is simple — match the chandelier's path to the stair: spiral stairs take spiral glass, straight flights take diagonal swarms, and square stairwells take suspended columns. All pieces are engineered for high atriums and adjust in drop length and density to the exact stair height.
